Customer File - Enter	No Security

Security

1. From the main menu, click on the Blueprints icon.
2. Click on the Security button.
3. Identify the Credit Card areas you wish to secure:
 - Credit Cards – Add Card on File
 - Credit Cards – Override Card on file
 - Credit Cards – Use Card on File
4. Double click in the security column next to the location that you wish to enable security. Or click once in the security column next to the location, and then click the Security button.
 - ❖ Notice that the field has changed from “No Security” to “Security”. A location is secure when “Security” is displayed.

Explanation of setting
Credit card required to book appointment?

[Reset to Blueprint Default] [Return to Previous Screen]

Require Card on File

1. From Blueprints, click on the Staff & Book button.
2. Click the Set Default Settings button.
3. Answer the question: Credit card required to book appointment?
4. Click the Save Answer button.

Payment Type

1. From Blueprints, click on the Payment Types button.
2. Click the Add button, type in the name of your new payment type and then click the OK button.
3. Type 'Card on File' in the Display Name field.
4. Type 'cof' in the Pay Code field.
5. Type in a quick key code. If all quick key codes are being utilized you may leave this field blank.
6. Since you are adding a new payment type, place a check in the Enable Payment box.
7. Leave the Non-Revenue box unchecked.
8. Check the Automatic verification box.
9. If you would like this payment type to open the cash drawer upon processing a ticket, place a check in the Opens Cash Drawer box.
10. Uncheck the Print Duplicate Receipts box.
11. Uncheck the Signature Line box.
12. If you would like to have this payment type appear on the ticket screen with an icon, click the Load Icon button and choose an icon.
13. Determine the order of your payment type in the list by clicking and dragging the name in the Payments in order of Appearance box.
14. Click the Update button.

Appointments

1. After you have selected a customer, when creating a new appointment, the system will search for an existing card on file for the customer.
2. The Card on File button will appear in Red if there is no card saved and Green if there is a one.
3. Once all services are added to the appointment, clicking the Done button will prompt you when a credit card is required to reserve the appointment and there is none on file.
 - Click the Yes button if you would like to override the requirement.
 - Click the No button to return to the appointment to add a card.
4. To add a Card on File from the Appointment, click the Card on File button.
5. Click the Add button to add a card to either the primary or alternate field.
6. Enter the card information and click the Authorize button.
 - ❖ To verify the validity of the card, the system will authorize the card for \$0.01.
7. Once approved, you will receive an approval message. Click the Ok button to continue reserving the appointment.
8. You can also access the cards on file to edit any existing cards. To edit saved cards, click the Edit button next to either the primary or secondary card you wish to edit.
